# Tone of voice principles

## Inspire possibilities.

**But don't overpromise.**
We always highlight potential and avoid idealism. We speak about the future, potential and possibility for growth but never make lofty claims about success or realized dreams.

## Simplify where you can.

**Don't overcomplicate.**
Riipen is all about simplifying processes and enabling accessibility. When it comes to our communication, the goal is the same. Avoid jargon and packing every fact into a message. We should aim for the simplest way to communicate our offerings.

## Find smart ways in.

**But don't be a know-it-all.**
Everything we do and everything we talk about is based on facts. However, it doesn't mean we are overly intellectual. Our communication should always be reliable and respectful in equal measure.

## Be relatable and human.

**But don't be too informal.**
The human element is always present in the way we speak as a brand, but we are never overly emotional or too familiar. Don't use slang, jargon, or idioms. Instead, ensure the conversational tone by being authentic and genuine.
